NUS Blockchain Pitch Night

Judge

Glenn Gore is CEO of LemmaTree and Affinidi and is responsible for the group's overall business strategy and development. In this position, Glenn spearheads strategic initiatives aimed at enabling a global ecosystem built on decentralized trust and self-sovereign identity solutions. He is also a board member for LemmaTree, GoodWorker and Trustana.

Glenn attended the Gymea Technology High School in Australia as a teenager. He then chose to forgo his further studies, in pursuit of his passion for technology. In 1997, he started his career as a system engineer for OzEmail, the largest ISP for Australia at that time. He was responsible for deploying and supporting systems back then.

Since then, Glenn has accumulated over 25 years of experience in the Internet industry leading disruptive innovation at scale. Prior to joining Affinidi, Glenn was the Chief Architect for Amazon Web Services where he managed key programs to drive architectural best practices and technology thought leadership. He has previously held leadership positions at internet and ICT solution providers OzEmail, UUNet, MCI/Worldcom and WebCentral.

Glenn is passionate about the role and positive impact that technology has in shaping how we live, work, and learn. He is also a global board member of The Commons Project, a non-profit public trust that builds and operates digital platforms and
services for the common good. Alongside distinguished leaders on the board, Glenn helps guide and provide technology advice to further the interests of the foundation.
